CERTIFICATE OF ANALYSIS (CoA)

DRAFT — BASED ON USER-PROVIDED INFORMATION

Product	Crayola Metallic Sidewalk Chalk (Copper Sparkle)
Batch / Lot Number	BATCH-CHK-2026-FAIL
Manufacture Date	October 2026

TEST RESULTS

Test Parameter	Specification	Result	Status
Appearance	Extruded Chalk Stick	Solid Stick	**PASS**
Breakage Strength	> 45 N (Pounds Force)	21 N	**FAIL**
Respirable Dust Emission	< 2.5 mg/m³	7.9 mg/m³	**FAIL**
Soluble Copper (Cu)	< 100 ppm	415 ppm	**FAIL**
Soluble Lead (Pb)	< 90 ppm	< 1.0 ppm	**PASS**
Asbestos in Talc Base	Not Detected	Detected	**FAIL**

REGULATORY / ACMI ASSESSMENT STATUS: CP REJECTED

Rejection Findings

1. Reported soluble copper and respirable fine dust results exceed the stated specification limits.
2. Microscopic screening reportedly identified trace asbestos fiber contamination in the raw talc material (CAS 14807-96-6).
3. The reported breakage strength is below the stated minimum mechanical strength criterion, indicating structural crumbling concerns.

Important notice

This document is a formatted draft created solely from information supplied by the requester. It is not an independently verified laboratory report, official Certificate of Analysis, or confirmation of any regulatory/ACMI decision. Test results, product identity, and the stated assessment status should be verified against authenticated laboratory records and the relevant authority before official use.
